Software Engineer

Full-stack engineer with 5+ years of experience building and scaling web applications, automation frameworks, and developer tooling. I've led feature development from design to deployment, improved **CI/CD pipelines** to speed up releases, and introduced **testing practices** that made teams more confident in their code. I care deeply about clean, maintainable code and creating environments where developers can move fast without breaking things.

Notable project: Songsemble (songsemble.com) — a collaborative music library platform built with **React**, **TypeScript**, and **Ruby on Rails**.

WORK EXPERIENCE

Park Software • 03/2025 - Present

Software Engineer

- Drove end-to-end test strategy for a complex SaaS platform, taking full ownership of the **Playwright** suite and expanding coverage across all mission-critical user flows.
- Architected enhancements to the **CircleCI** pipeline and **Slack** reporting, improving test visibility and cutting triage time for failures by 40%.
- Delivered key internationalization features (support for global phone number formats) in **React**, expanding product reach and improving data consistency.
- Partnered with product and engineering leadership to embed automated QA into the sprint cycle, driving a shift-left culture.
- Mentored other engineers on best practices for **test automation** and **deployment workflows**.

Darcy Partners • 03/2022 - 02/2025

Software Developer

- Led design and delivery of major features using **Ruby on Rails** and **Ember.js**, directly impacting client onboarding and internal workflow automation.
- Maintained a robust automated testing framework using **RSpec**, **Playwright**, and **GitHub Actions**, cutting manual QA time in half.
- Owned and maintained a suite of 1,000+ end-to-end tests, enabling rapid validation of product stability and reducing post-deployment defects by over 30%.
- Drove a **mobile-first** initiative—redesigned key user flows for responsive performance, increasing mobile engagement and session duration metrics.

QA Engineer • Contractor

- Strengthened product reliability by maintaining and scaling automated **test coverage**, achieving a 75% increase in coverage for new features within one quarter.

Crete Public Schools • 08/2021 - 05/2022

6-12 Vocal Music Director

Raymond Central Public Schools • 08/2010 - 05/2021

K-12 Vocal Music Director

EDUCATION

Master of Music in Education

University of Nebraska • Lincoln, NE

B.A. in Music Education and Vocal Performance

Doane University • Crete, NE

CERTIFICATIONS

CompTIA A+ • 03/2025 - 03/2028

CompTIA

PROJECTS

Songsemble

Rails, React, Typescript, RSpec, JWT Authentication, State management with Zustand, Amazon S3 for images, SendGrid mailer for reset password workflow, Github Actions to run unit tests on push

Blog

Rails with Devise Authentication, Web scraping using Ruby to initially seed database

SKILLS

Languages & Frameworks

- Ember
- JavaScript
- .NET/C#
- React
- Ruby on Rails
- TypeScript

Testing & CI/CD

- CircleCI
- GitHub Actions
- Playwright
- RSpec
- Selenium

Databases & Tools

- Amazon S3
- Postgres
- Tailwind CSS
- Tailwind CSS

Practices

- Agile Development
- Automated Testing
- CI/CD Pipelines
- Cross-Functional Collaboration
- Problem Solving
